DATA SHEET

DualBand Small Cell Panel Antenna

SCA65F-UJ1A

- One foot (0.3 m), Dualband, eight port antenna with a 65° azimuth beamwidth and 40° elevation beamwidth, covering 1695-2400 MHz and 5150-5925 MHz frequencies
- Four Ultra-wideband ports covering 1695-2400 MHz and two pairs of two U-NII band ports covering 5150-5925 MHz, all within in a low weight and low profile 1'x1' panel antenna
- Full Spectrum Compliance for 1695-2400 MHz and U-NII frequencies
- Antenna meets U-NII pattern and gain requirements per FCC/ECC regulations
- The Low weight and Low profile of this panel antenna makes this an ideal solution for Small Cell/C-RAN Densification deployments in difficult jurisdictional urban, suburban and rural environments
- Ordering options for multiple mounting brackets, including simple wall mounting or Dual-Axis adjustment bracket. Which makes it ideal for mounting on utility, lighting and traffic poles
- Antenna has Fixed EDT of 4° for the 1695-2400 MHz ports and 5° for EDT U-NII 5150-5925 MHz ports
- Exceeds minimum PIM performance requirements
- Equipped with 4.3-10 connectors, which is 40% smaller than 7/16 DIN connectors

Overview

The CCI Dualband 65° x 40° array is an Eight port Small Cell antenna, with four Ultra-wideband ports covering 1695-2400 MHz and two pairs of two U-NII band ports covering 5150-5925 MHz. The CCI 65° x 40° Small Cell antenna provides 4x4 Multiple-input-Multiple-output (MIMO) functionality across the 1695-2400 MHz ports and provides Dual 2x2 Multiple-input-Multiple-output (MIMO) functionality across the 5150-5925 MHz ports.

The CCI 65° x 40° Small Cell antenna is an ideal solution for Small Cell/C-RAN/o-DAS Densification deployments in difficult jurisdictional urban, suburban and rural where antenna size and count are restricted.

CCI antennas are designed and produced to ISO 9001 certification standards for reliability and quality in our state-of-the-art manufacturing facilities.

Applications

- Small Cell/C-RAN/o-DAS in Urban, Suburban and other visually sensitive environments
- Ideal for Macro to Small Cell Coverage Transition Zones
- Outdoor Distributed Antenna Systems (oDAS), neutral host in venues, campuses and other outdoor coverage applications
